Professional Profile

Motivated Junior Software Developer with 2 years of experience developing Python applications and working with relational databases. Strong understanding of object-oriented programming, REST APIs and software development principles. Enjoys solving technical problems and working collaboratively within development teams.

Technical Skills

- **Programming Languages:** Python, Java, JavaScript
- **Databases:** MySQL, PostgreSQL
- **Frameworks:** Flask, Django
- **Tools:** Git, GitHub, Docker, VS Code
- **Other Skills:** REST APIs, Unit Testing, Agile Development

Work Experience

Junior Software Developer

ABC Technology Ltd | June 2024 – Present

- Developed and maintained Python applications for internal business systems.
- Built REST APIs using Flask.
- Worked with PostgreSQL databases to store and retrieve application data.
- Wrote unit tests using pytest to improve code reliability.
- Collaborated with a team of five developers using Agile methodologies.
- Helped investigate and resolve software bugs.

Software Development Intern

XYZ Solutions | January 2024 – May 2024

- Assisted senior developers with Python development tasks.
- Created SQL queries to retrieve and analyse data.
- Participated in code reviews and team meetings.
- Documented software functionality and technical processes.

Education

BSc Computer Science

University of Westminster | September 2020 – June 2023

Relevant modules:

- Software Engineering
- Database Systems
- Data Structures and Algorithms
- Artificial Intelligence
- Web Development

Final Grade: 2:1

Projects

Personal Expense Tracker

- Developed a personal finance application using Python and Flask.
- Implemented user authentication and expense tracking.
- Used SQLite to store user and transaction information.

Weather Dashboard

- Created a weather dashboard using JavaScript and a public weather API.
- Displayed current weather conditions and temperature information.
- Designed a responsive user interface.

Hobbies and Interests

- Playing five-a-side football.

- Reading technology and software development blogs.
- Contributing to small open-source projects.
- Learning about artificial intelligence and machine learning.
